2026/ 27 Season CSR Plan

I spent many hours examining the previous year's stats and playoffs results and have come up with the criteria to form teams for the coming 2026/27 season in the Winnipeg League.

First criteria, the top 2 teams in each division in the 2026 Playoffs MUST move up to the next level. All players that play a minimum of 1 game during the tournament will have their ranked changed to the next divisions level. These players won't be allowed to play below their individual rank for the 2026/27 season.

Second criteria, there will be a team CSR cap for each division. This will be enforced in the following manner:

- I will be freezing all players CSR as of June 1st, 2026.
- The frozen CSR, will be the number that I use to calculate a team's Team Total CSR. This number could be different than your actual CSR in September.
- When submitting a roster, I will add up the top 5 players CSR. That total must fall below the cap that I institute for each division to qualify to play in that division.
- You will still be able to add players to your roster throughout the year, but your team MUST remain cap compliant.
- New players to the league that don't have a CSR will be assigned one. The assigned CSR will be the average of all of the players that are registered in that level as of September 5th, 2026.
- Players can only play 1 level below their Aactive League rank.

We will be going away from using the 0,1, 2 & 3 handicap system this year. Starting in September we will be using CSR to handicap matches. How the handicap will work is, both teams will enter all of your players on the Compu Sport app. The team with the lower total team CSR will get 1 point of handicap for every 70 points difference between the two teams per round.

You will be able to view all divisions Team CSR Cap on the poster in this Newsletter.

There will be questions, please contact me to get the answers you need to form your team.
